

Jose-Luis Jimenez is a Professor of Chemistry and a Fellow of CIRES at the University of Colorado at Boulder. He earned his PhD at MIT in 1999 and his MS at the Univ. of Zaragoza (Spain) and Univ. of Compiègne (France) in 1993. His research group focuses on advanced real-time aerosol measurements, as well as computer modeling. He is a Highly Cited Researcher, and a Fellow of the AAAR and the AGU. He has been investigating airborne transmission for the last 2 years, and has coauthored papers in e.g. [The Lancet](#) and [Science](#) on this topic, and has collaborated on research on the history of this topic [1, 2].
